Utah demographics

2022 Utah population:
3,380,800¹

	Utah	U.S.	AIAN [†]	Asian	Black	NHPI [‡]	White	Other race or ≥2 races	Hispanic/Latino*	Data year
Life expectancy at birth										
Life expectancy for males, age in years ^{3,16,18,19}	76.4	73.5	75.5	87.0	77.9	72.7	75.9	83.9	81.7	Ω
Life expectancy for females, age in years ^{3,16,18,19}	80.8	79.3								
Age group										
Percentage of population younger than 10 years of age ¹	14.3	11.4	7.6	9.5	16.4	20.8	13.4	19.3	18.6	2022
Percentage of population aged 10–19 years ¹	16.4	12.9	18.0	10.5	20.6	16.3	15.8	20.3	20.2	2022
Percentage of population aged 20–34 years ¹	23.5	20.3	29.2	30.2	30.8	24.3	22.9	24.3	25.3	2022
Percentage of population aged 35–44 years ¹	13.6	13.2	12.3	17.9	9.3	13.2	13.7	13.1	13.0	2022
Percentage of population aged 45–64 years ¹	20.2	24.8	24.7	22.3	19.0	18.9	20.6	17.9	17.9	2022
Percentage of population 65 years or older ¹	11.9	17.3	8.2	9.6	4.0	6.4	13.5	5.1	5.0	2022
Race**										
Percentage of population who are White alone ¹	79.2	60.9	NA	NA	NA	NA	NA	NA	NA	2022
Percentage of population who are Black alone ¹	1.1	12.2	NA	NA	NA	NA	NA	NA	NA	2022
Percentage of population who are American Indian alone ¹	1.0	1.0	NA	NA	NA	NA	NA	NA	NA	2022
Percentage of population who are Asian alone ¹	2.5	5.9	NA	NA	NA	NA	NA	NA	NA	2022
Percentage of population who are Native Hawaiian or Pacific Islander alone ¹	1.1	0.2	NA	NA	NA	NA	NA	NA	NA	2022

[†]American Indian or Alaskan Native (AIAN); [‡]Native Hawaiian or Pacific Islander (NHPI); *A person of any race can also have Hispanic/Latino ethnicity **Race is presented as single race alone and non-Hispanic unless otherwise noted; Ω UT 2022: 5-year estimate for ethnicity (2018-2022); U.S. 2021; NA = Not available

Utah demographics

	Utah	U.S.	AIAN	Asian	Black	NHPI	White	Other race or ≥2 races	Hispanic/Latino*	Data year
Race** (continued)										
Percentage of population who are 2 or more races or some other race ¹	15.0	19.8	NA	NA	NA	NA	NA	NA	NA	2022
Percentage of population who are Hispanic/Latino* ¹	15.1	19.1	NA	NA	NA	NA	NA	NA	NA	2022
Gender										
Percentage of population who are males ¹	50.8	49.6	53.6	46.7	54.0	50.6	50.6	51.8	51.9	2022
Percentage of population who are females ¹	49.2	50.4	46.4	53.3	46.0	49.4	49.4	48.2	48.1	2022
Education										
Percentage of adults (aged ≥25), with less than a high school education ¹	7.0	10.4	19.4	13.9	14.3	7.3	4.1	22.1	24.6	2022
Percentage of adults (aged ≥25), who completed high school ¹	22.0	26.1	31.8	19.6	23.9	34.8	20.9	27.8	29.9	2022
Percentage of adults (aged ≥25), who completed some college or an associate's degree ¹	33.1	27.9	27.7	15.6	32.8	36.0	34.6	27.7	26.3	2022
Percentage of adults (aged ≥25), with a Bachelor's degree ¹	24.7	21.6	15.8	26.9	19.0	17.9	26.4	15.1	13.1	2022
Percentage of adults (aged ≥25), with a postgraduate or professional degree ¹	13.2	14.0	5.3	24.0	10.0	4.0	14.0	7.4	6.1	2022
Primary language spoken at home										
Percentage of population (aged ≥5) who only speak English at home ¹	84.2	78.0	49.9	30.1	68.1	51.1	94.1	38.4	35.8	2022
Percentage of population (aged ≥5) who speak a language other than English at home ¹	15.8	22.0	50.1	69.9	32.0	48.9	5.9	61.6	29.1	2022

*A person of any race can also have Hispanic/Latino ethnicity, **Race is presented as single race alone and non-Hispanic unless otherwise noted.

Utah demographics

	Utah	U.S.	AIAN	Asian	Black	NHPI	White	Other race or ≥2 races	Hispanic/Latino*	Data year
Foreign born										
Percentage of population who were not born in the United States ¹	8.6	13.9	16.8	64.1	22.9	29.1	2.4	29.4	32.0	2022
Household type										
Percentage of households that are families ^{1a}	73.5	64.1	69.8	71.1	73.9	90.2	73.0	76.9	76.1	2022
Percentage of occupied housing units that are owner occupied ¹	71.2	65.2	62.1	60.1	27.6	57.9	74.0	58.3	56.1	2022
Percentage of households that have one or more children younger than 18 years of age ¹	30.6	39.7	39.4	41.0	44.5	62.0	38.4	51.3	52.6	2017-2021
Employment status										
Percentage of Utahns (aged ≥16) who are employed ¹	67.8	60.3	63.5	72.1	75.1	63.1	66.7	72.1	72.1	2022
Poverty status										
Percentage of population living below 100% poverty ¹	8.2	12.6	18.2	10.0	14.3	11.6	7.4	10.9	12.0	2022
Percentage of children younger than 18 years of age living below 100% poverty ¹	8.4	16.3	17.2	12.9	13.8	14.3	7.1	12.4	14.4	2022
Percentage of households receiving food stamps or Supplemental Nutrition Assistance Program benefits in the past 12 months ¹	5.2	12.4	12.1	4.0	12.8	21.1	4.7	6.5	6.8	2022

*A person of any race can also have Hispanic/Latino ethnicity, **Race is presented as single race alone and non-Hispanic unless otherwise noted.

Child demographics

Gender and age (2022)¹⁹

Race/ethnicity (children aged 0-19) (2022)¹⁹

Family demographics (children aged 0-17) (2022)⁶

Percent of children with any parent born outside of the U.S.

Percent of children where language most spoken in household is other than English

Percent of children living in a single parent household (mother or father)

Percent of children living in households where the highest level of education is less than high school

● State ● Hispanic/Latino ● White ● Other, non-Hispanic

*Estimate should be interpreted with caution; ^Non-Hispanic Other Race does not include non-Hispanic Black in this case, and the non-Hispanic Other estimate should be interpreted with caution.

Maternal demographics

Mothers who are married at the time of birth:

Mothers who participate in WIC:

Mothers who live in rural communities:

Education

Race

Ethnicity

Place of birth

Title V National Performance Measures

National Performance Measures (NPMs) are short-to-medium term performance measures that use population-based, state-level data derived from national data sources and for which a state Title V program tracks prevalence rates and works towards demonstrated impact.

Women and maternal health

Percentage of women who attended a postpartum check-up within 12 weeks after giving birth (2021)²

91

91

--

Percentage of women who attended a postpartum checkup and received recommended care components (2021)²

77

--

--

Percentage of women who were screened for depression or anxiety following a recent live birth²

--

--

--

Data for this measure is forthcoming

Percentage of women using a most or moderately effective contraceptive following a recent live birth (2021)^{2h}

56

50

--

Data not available because of data suppression or lack of data

Percentage of women with a recent live birth who experienced racial/ethnic discrimination while getting health care during pregnancy, delivery, or at a postpartum care visit²

--

--

--

Data for this measure is forthcoming

Percentage of women who had a preventive dental visit during pregnancy (UT 2021; U.S. 2020)²

56

45

--

Perinatal and infant health

Percentage of very low birth weight (VLBW) infants born in a hospital with a level III+ neonatal intensive care unit (NICU) (2020-2022)³

85

--

--

Data not available because of data suppression or lack of data

Percentage of infants who were ever breastfed who were born in 2020⁸

86

83

--

Data not available because of data suppression or lack of data

Percentage of children who were breastfed exclusively for 6 months⁶

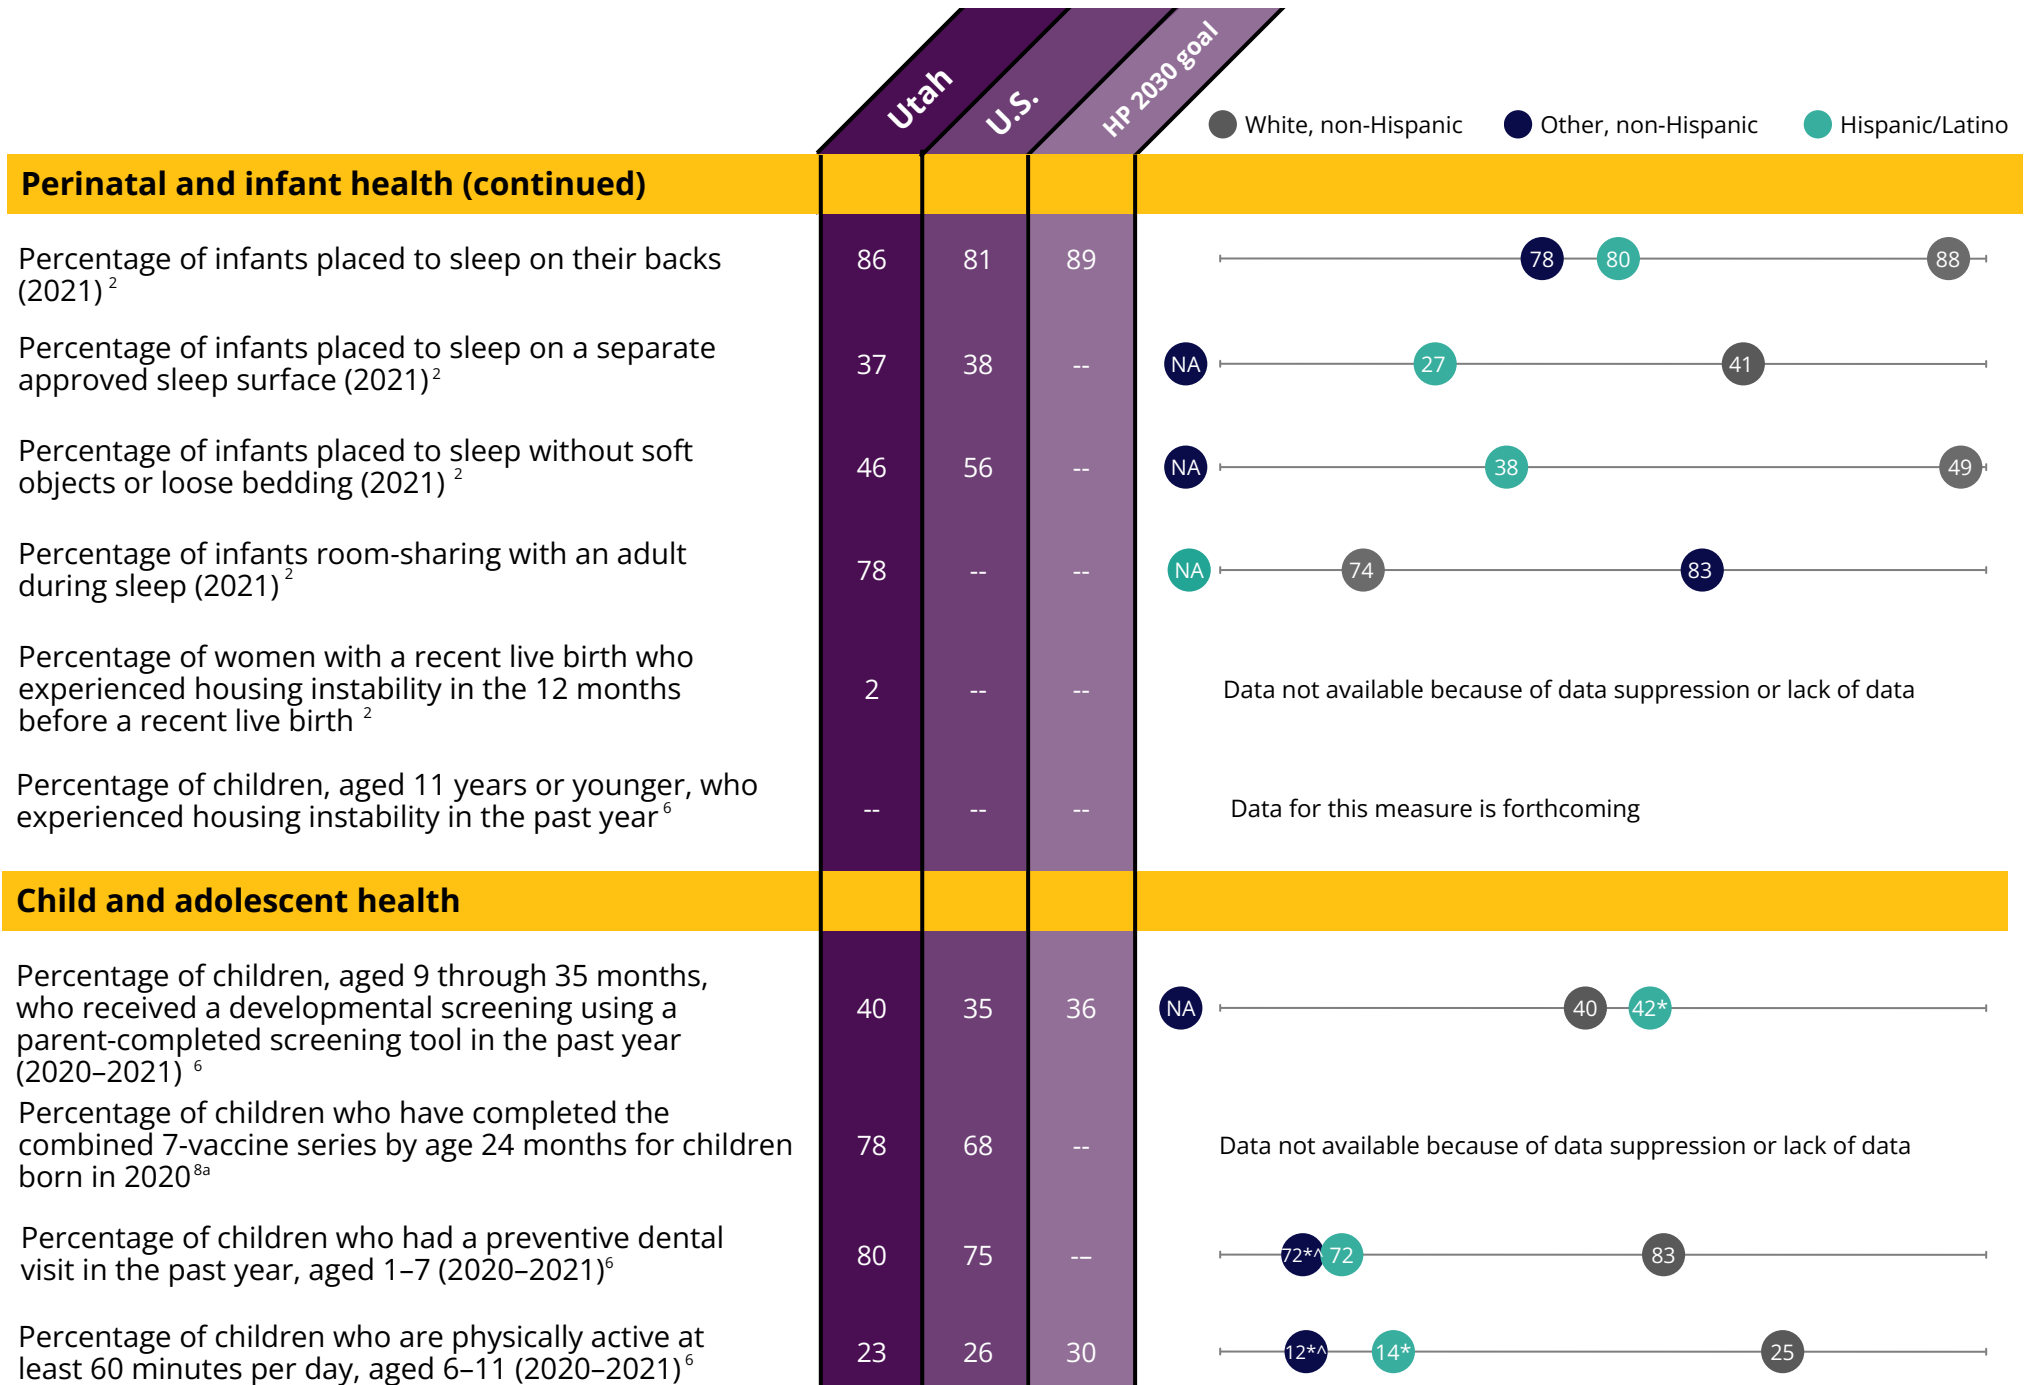

27

28

--

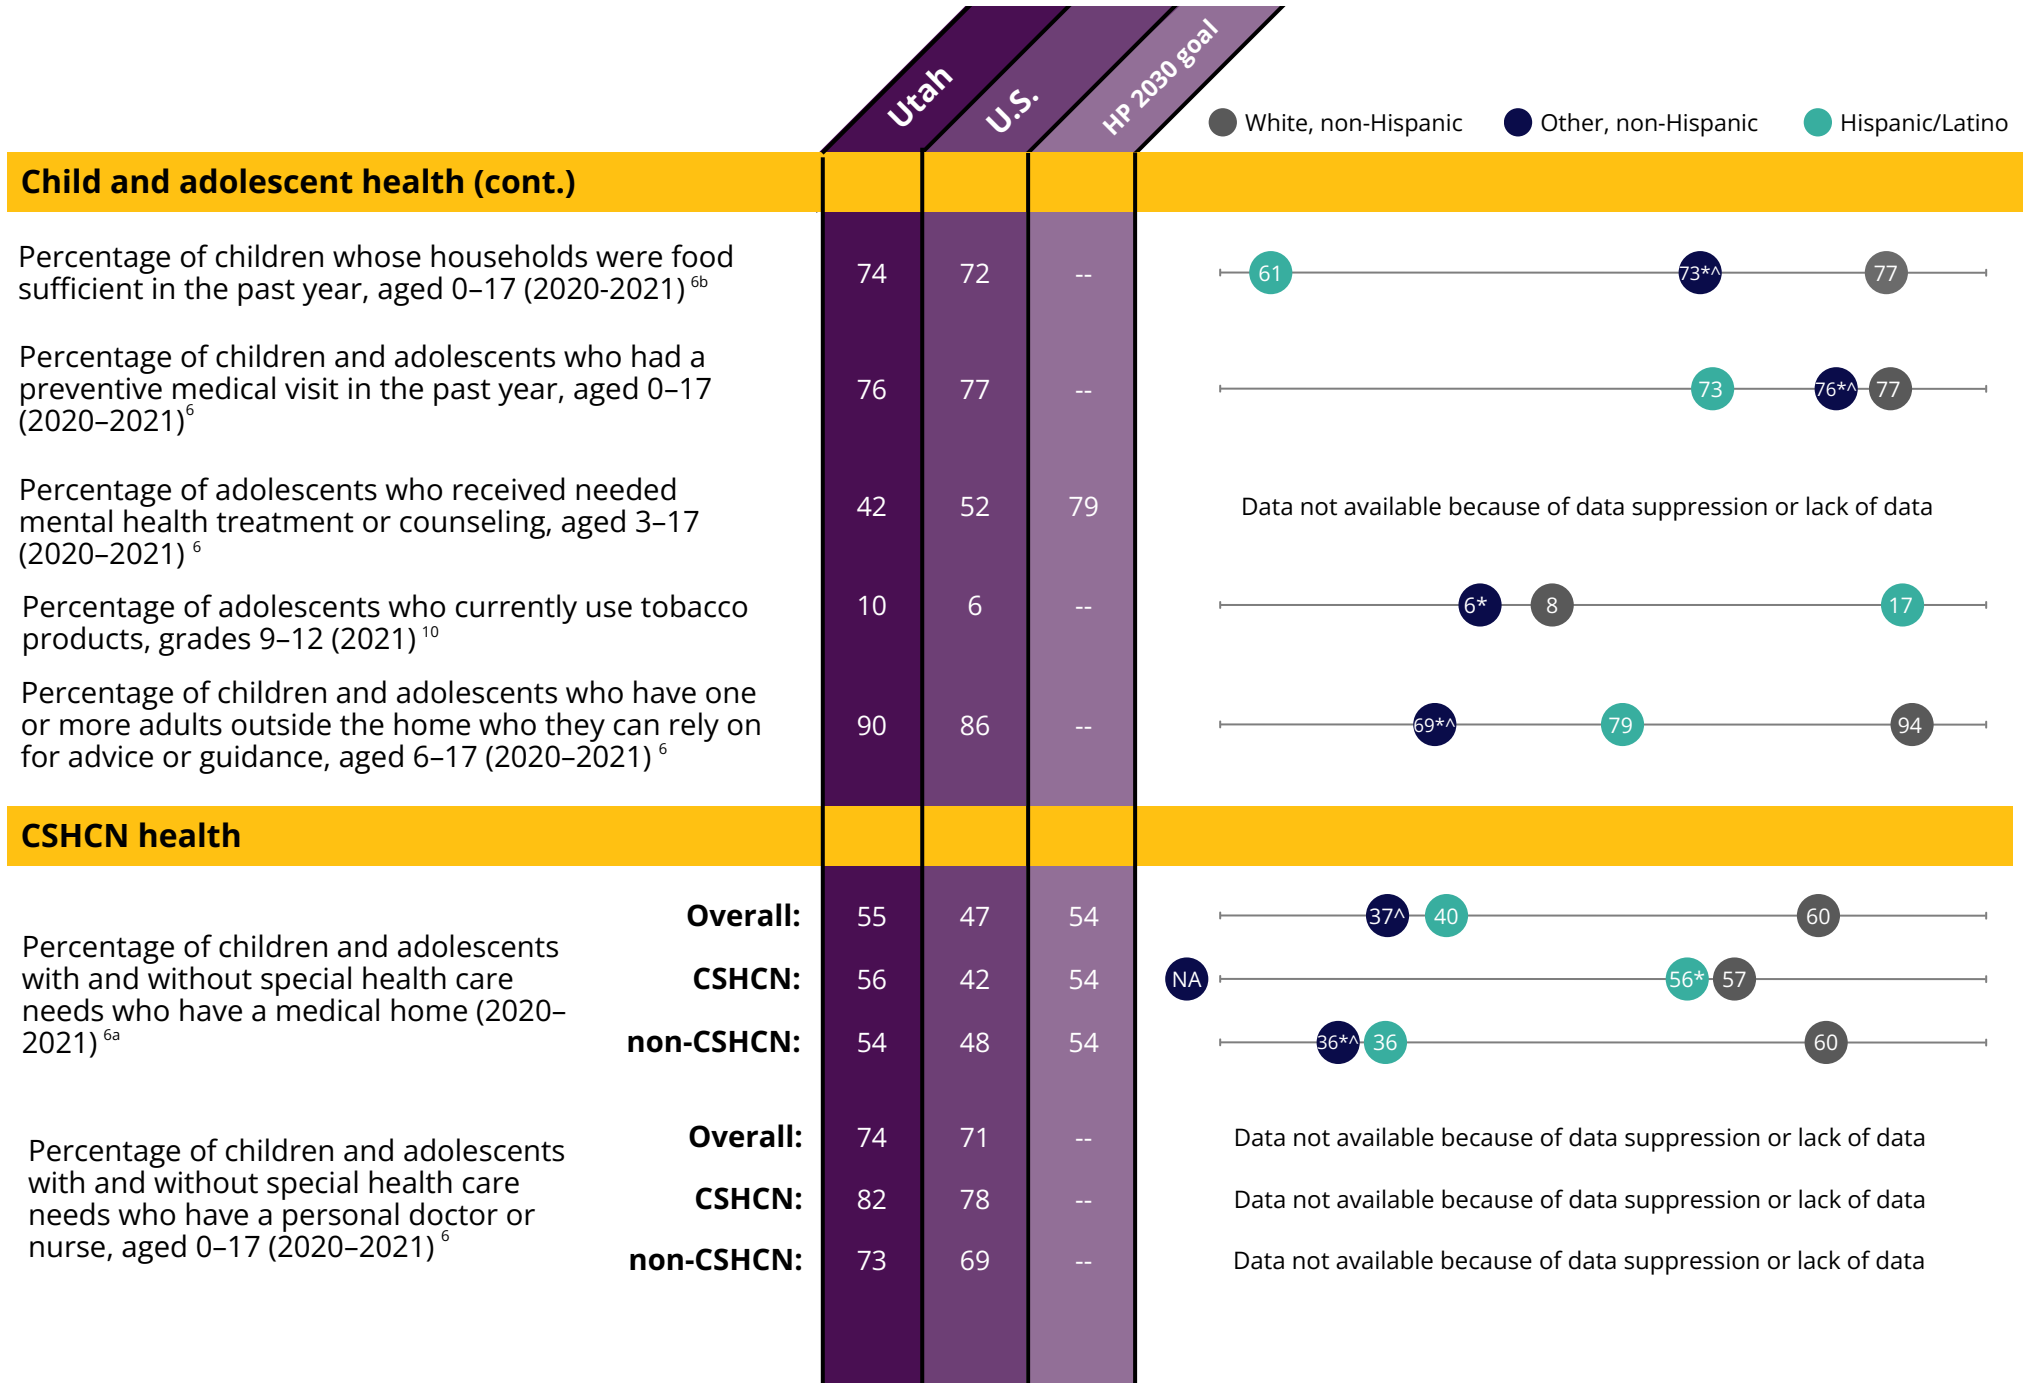

Title V National Performance Measures

Healthy People (HP) 2030: <https://health.gov/healthypeople>

*Estimate should be interpreted with caution; ^Non-Hispanic Other Race does not include non-Hispanic Black in this case, and the non-Hispanic Other estimate should be interpreted with caution;

Title V National Performance Measures

Healthy People (HP) 2030: <https://health.gov/healthypeople>

*Estimate should be interpreted with caution; ^Non-Hispanic Other Race does not include non-Hispanic Black in this case, and the non-Hispanic Other estimate should be interpreted with caution.

Title V National Performance Measures

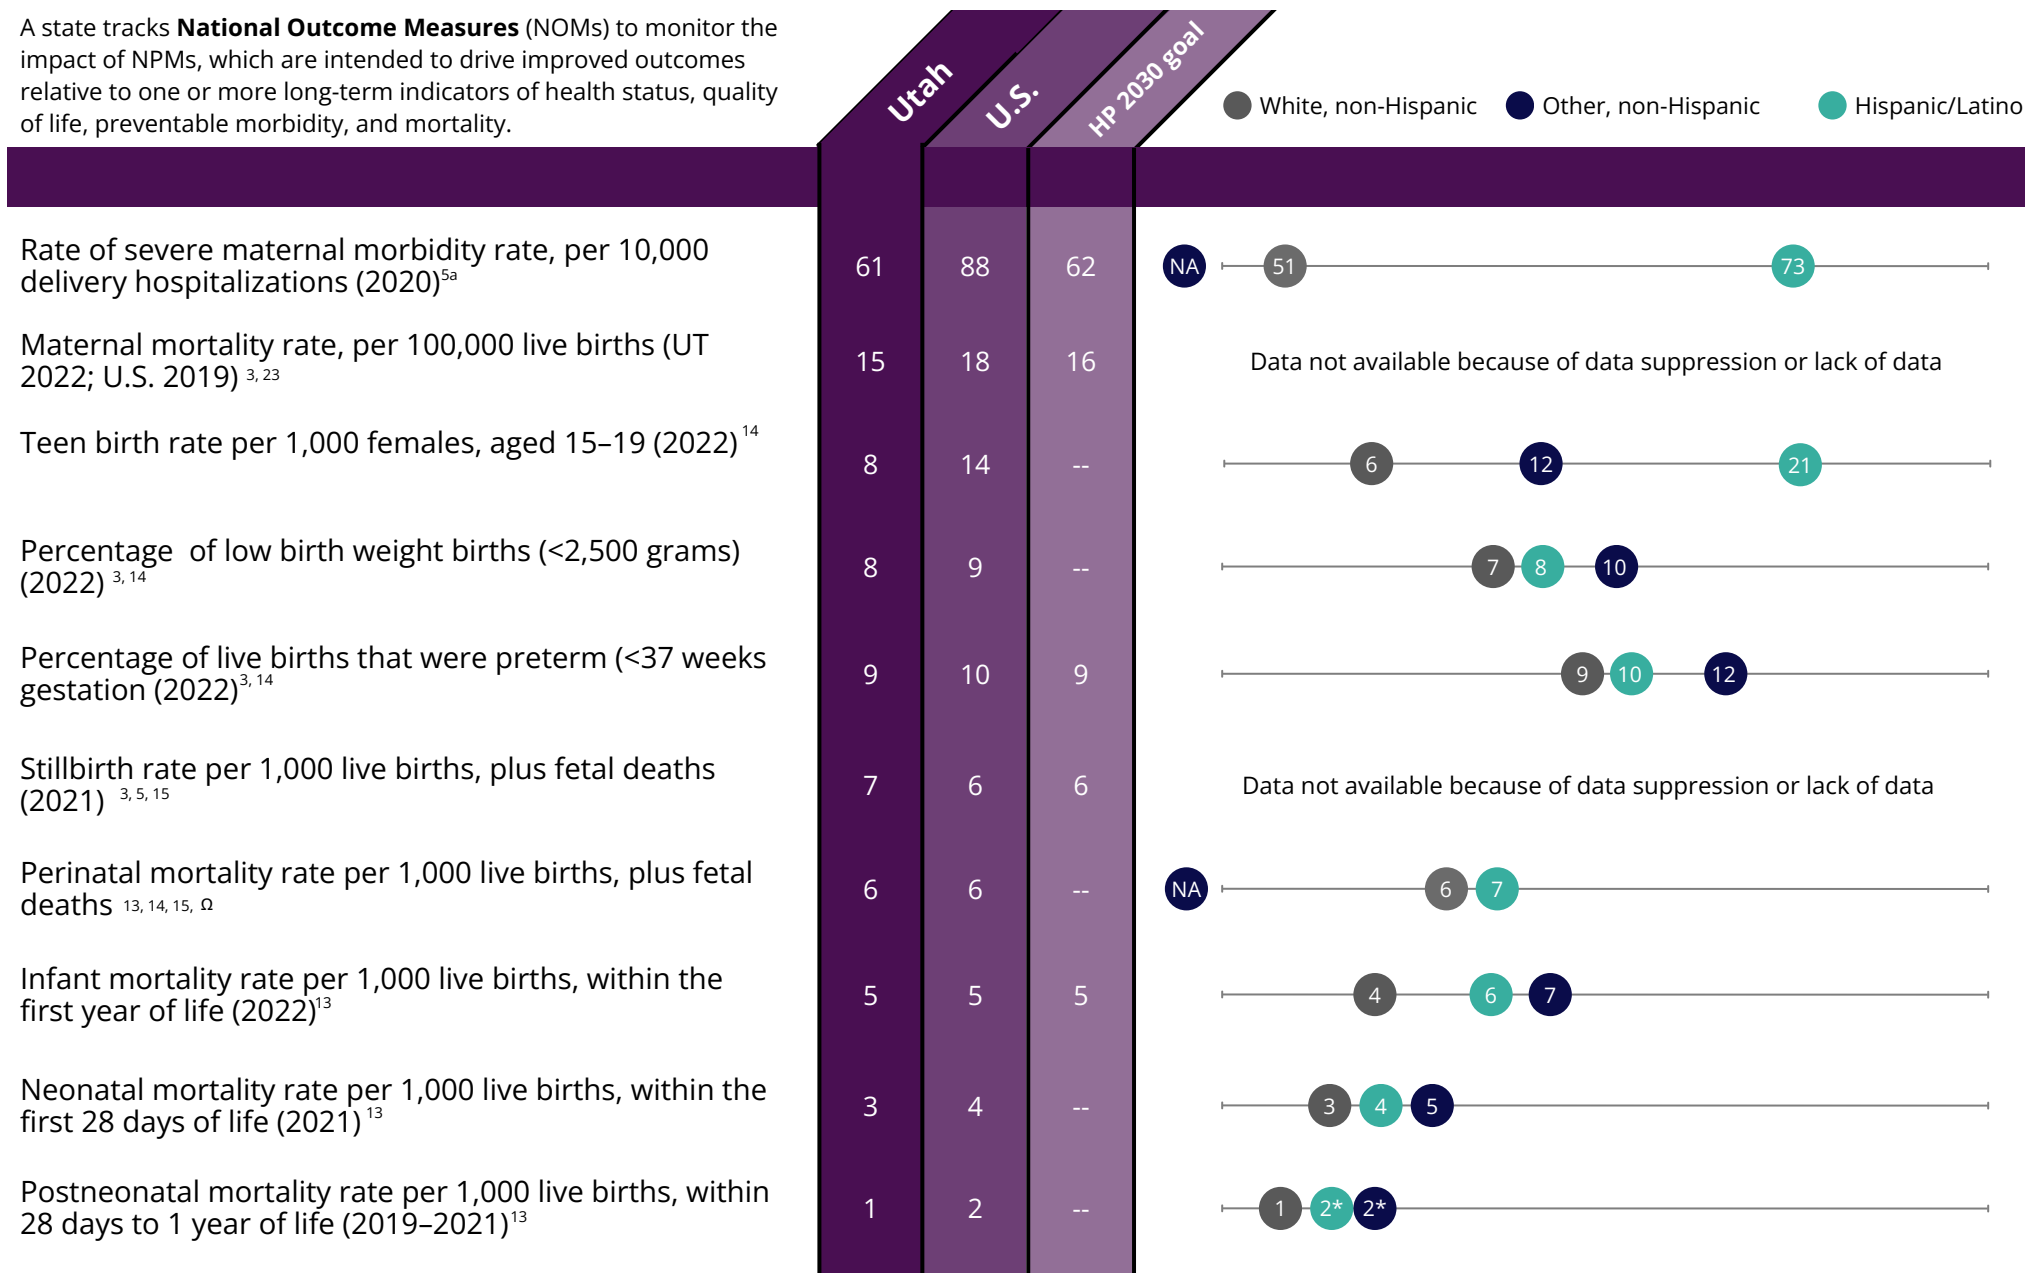

CSHCN health (continued)		Utah	U.S.	HP 2030 goal			
					● White, non-Hispanic	● Other, non-Hispanic	● Hispanic/Latino
Percentage of children and adolescents with and without special health care needs who have usual source of care, aged 0–17 (2020–2021) ⁶	Overall:	82	75	--	Data not available because of data suppression or lack of data		
	CSHCN:	89	80	--	Data not available because of data suppression or lack of data		
	non-CSHCN:	81	73	--	Data not available because of data suppression or lack of data		
Percentage of children and adolescents with and without special health care needs who have family centered care, aged 0–17 (2020–2021) ⁶	Overall:	87	86	--	Data not available because of data suppression or lack of data		
	CSHCN:	87	83	--	Data not available because of data suppression or lack of data		
	non-CSHCN:	87	87	--	Data not available because of data suppression or lack of data		
Percentage of children and adolescents with and without special health care needs who receive needed referrals, aged 0–17 (2020–2021) ⁶	Overall:	86	79	--	Data not available because of data suppression or lack of data		
	CSHCN:	81	71	--	Data not available because of data suppression or lack of data		
	non-CSHCN:	90	86	--	Data not available because of data suppression or lack of data		
Percentage of children and adolescents with and without special health care needs who receive needed care coordination, aged 0–17 (2020–2021) ⁶	Overall:	74	70	--	Data not available because of data suppression or lack of data		
	CSHCN:	66	58	--	Data not available because of data suppression or lack of data		
	non-CSHCN:	76	75	--	Data not available because of data suppression or lack of data		
Percentage of adolescents with and without special health care needs who received services necessary to make transitions to adult health care, aged 12–17 (2020–2021) ⁶	Overall:	13	17	--			
	CSHCN:	19	21	--	Data not available because of data suppression or lack of data		
	non-CSHCN:	11	16	--			

Title V National Performance Measures

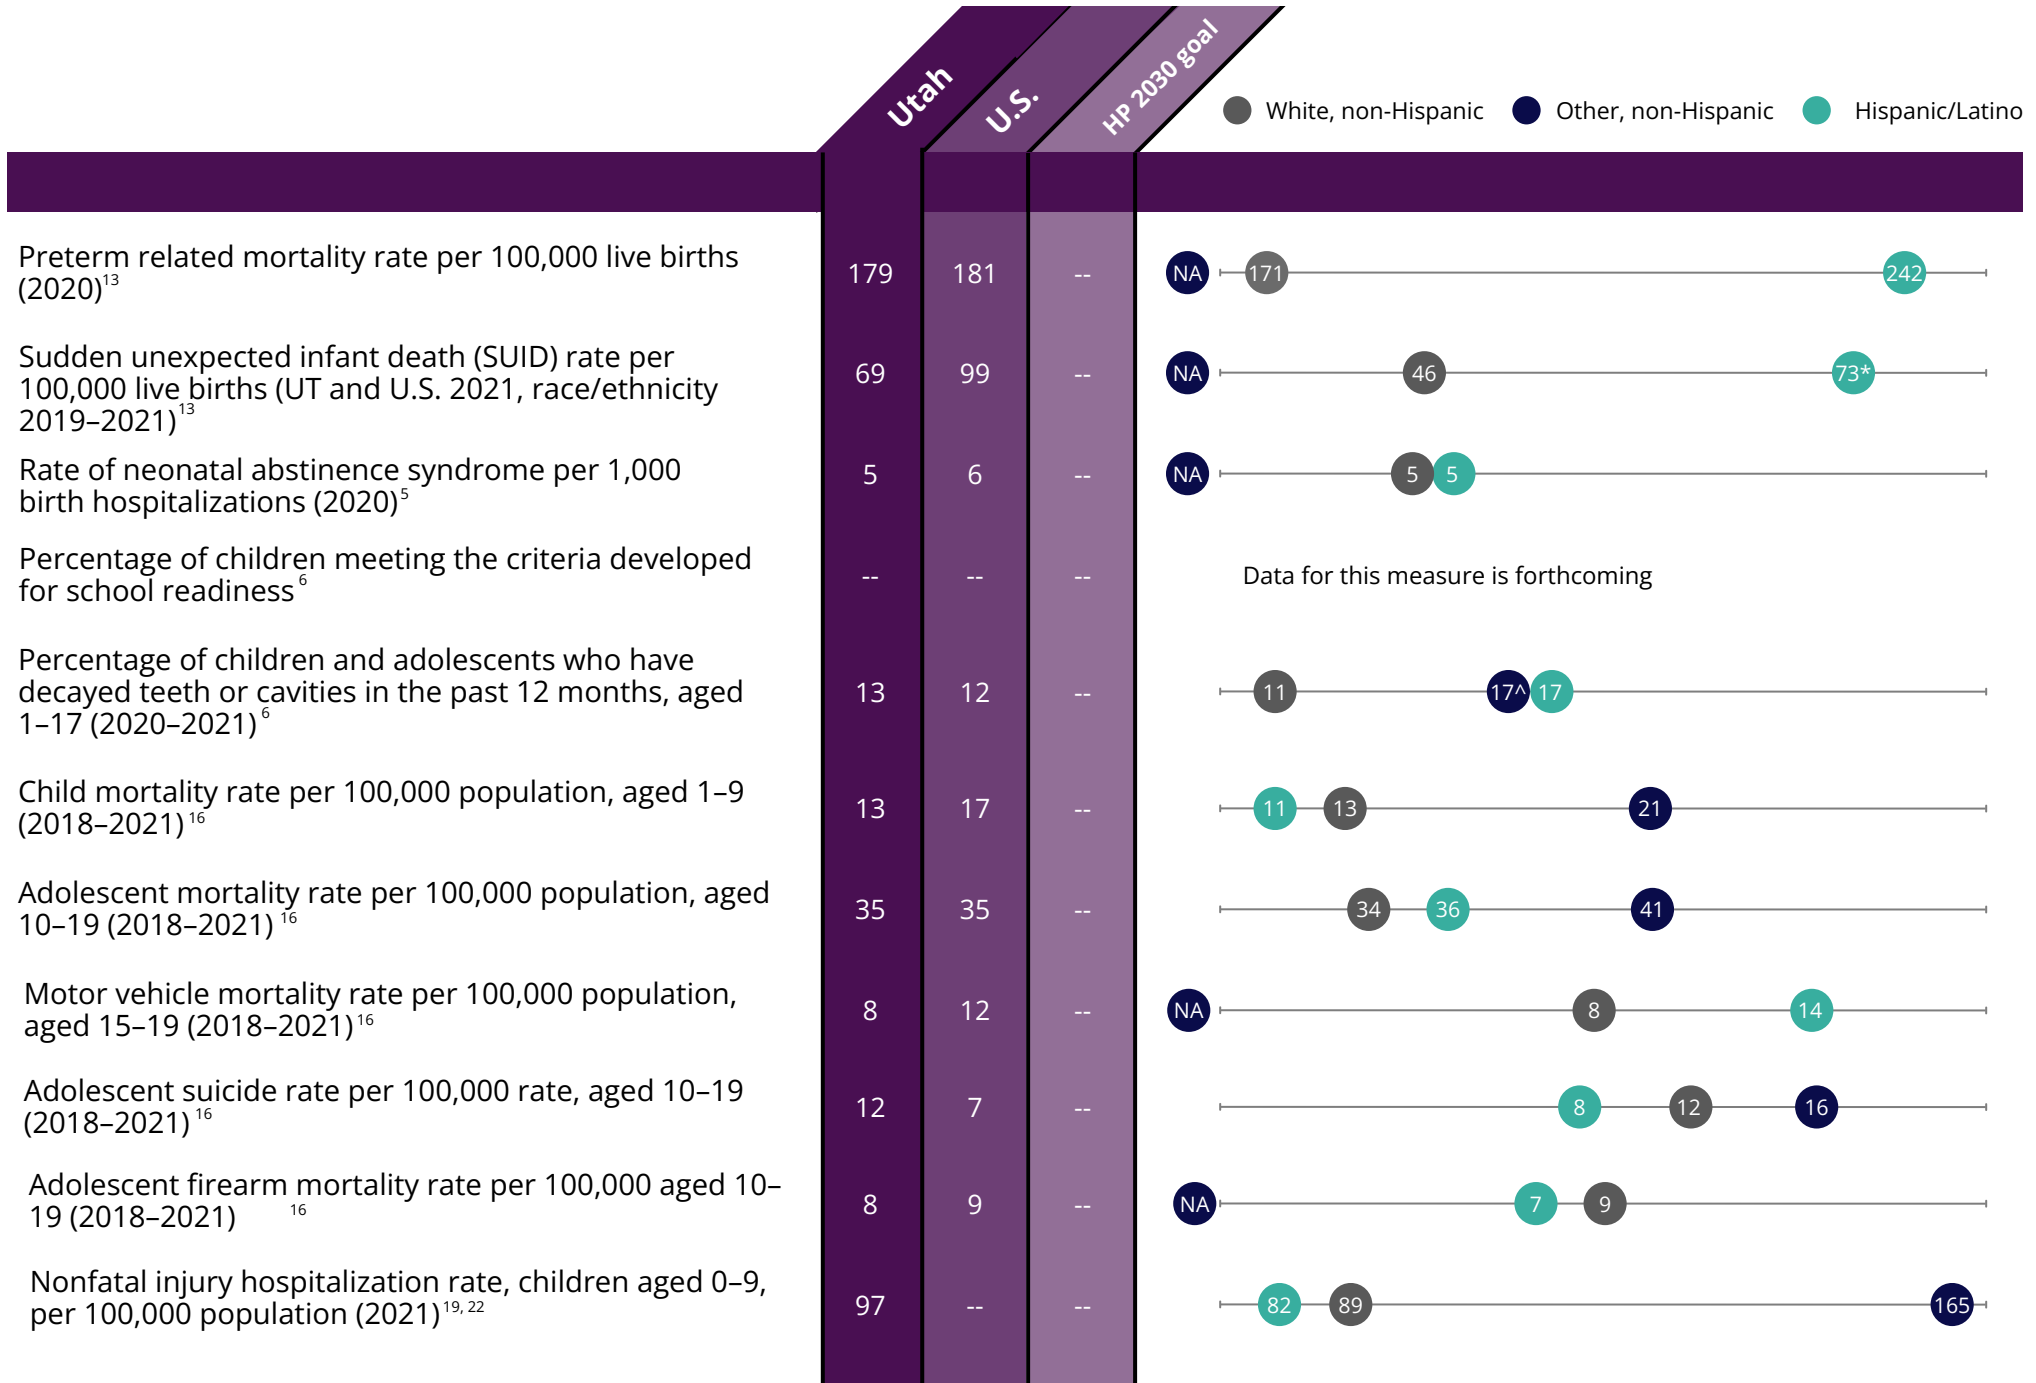

CSHCN health (continued)		Utah	U.S.	HP 2030 goal	
					● White, non-Hispanic ● Other, non-Hispanic ● Hispanic/Latino
Percentage of adolescents with and without special health care needs who are bullied, aged 12–17 (2020–2021) ⁶	Overall:	36	29	--	Data not available because of data suppression or lack of data
	CSHCN:	56	48	--	Data not available because of data suppression or lack of data
	non-CSHCN:	29	22	--	Data not available because of data suppression or lack of data
Percentage of adolescents with and without special health care needs who bully others, aged 12–17 (2020–2021) ⁶	Overall:	14	11	--	Data not available because of data suppression or lack of data
	CSHCN:	21	20	--	Data not available because of data suppression or lack of data
	non-CSHCN:	11	8	--	Data not available because of data suppression or lack of data

Title V National Outcome Measures (NOM)

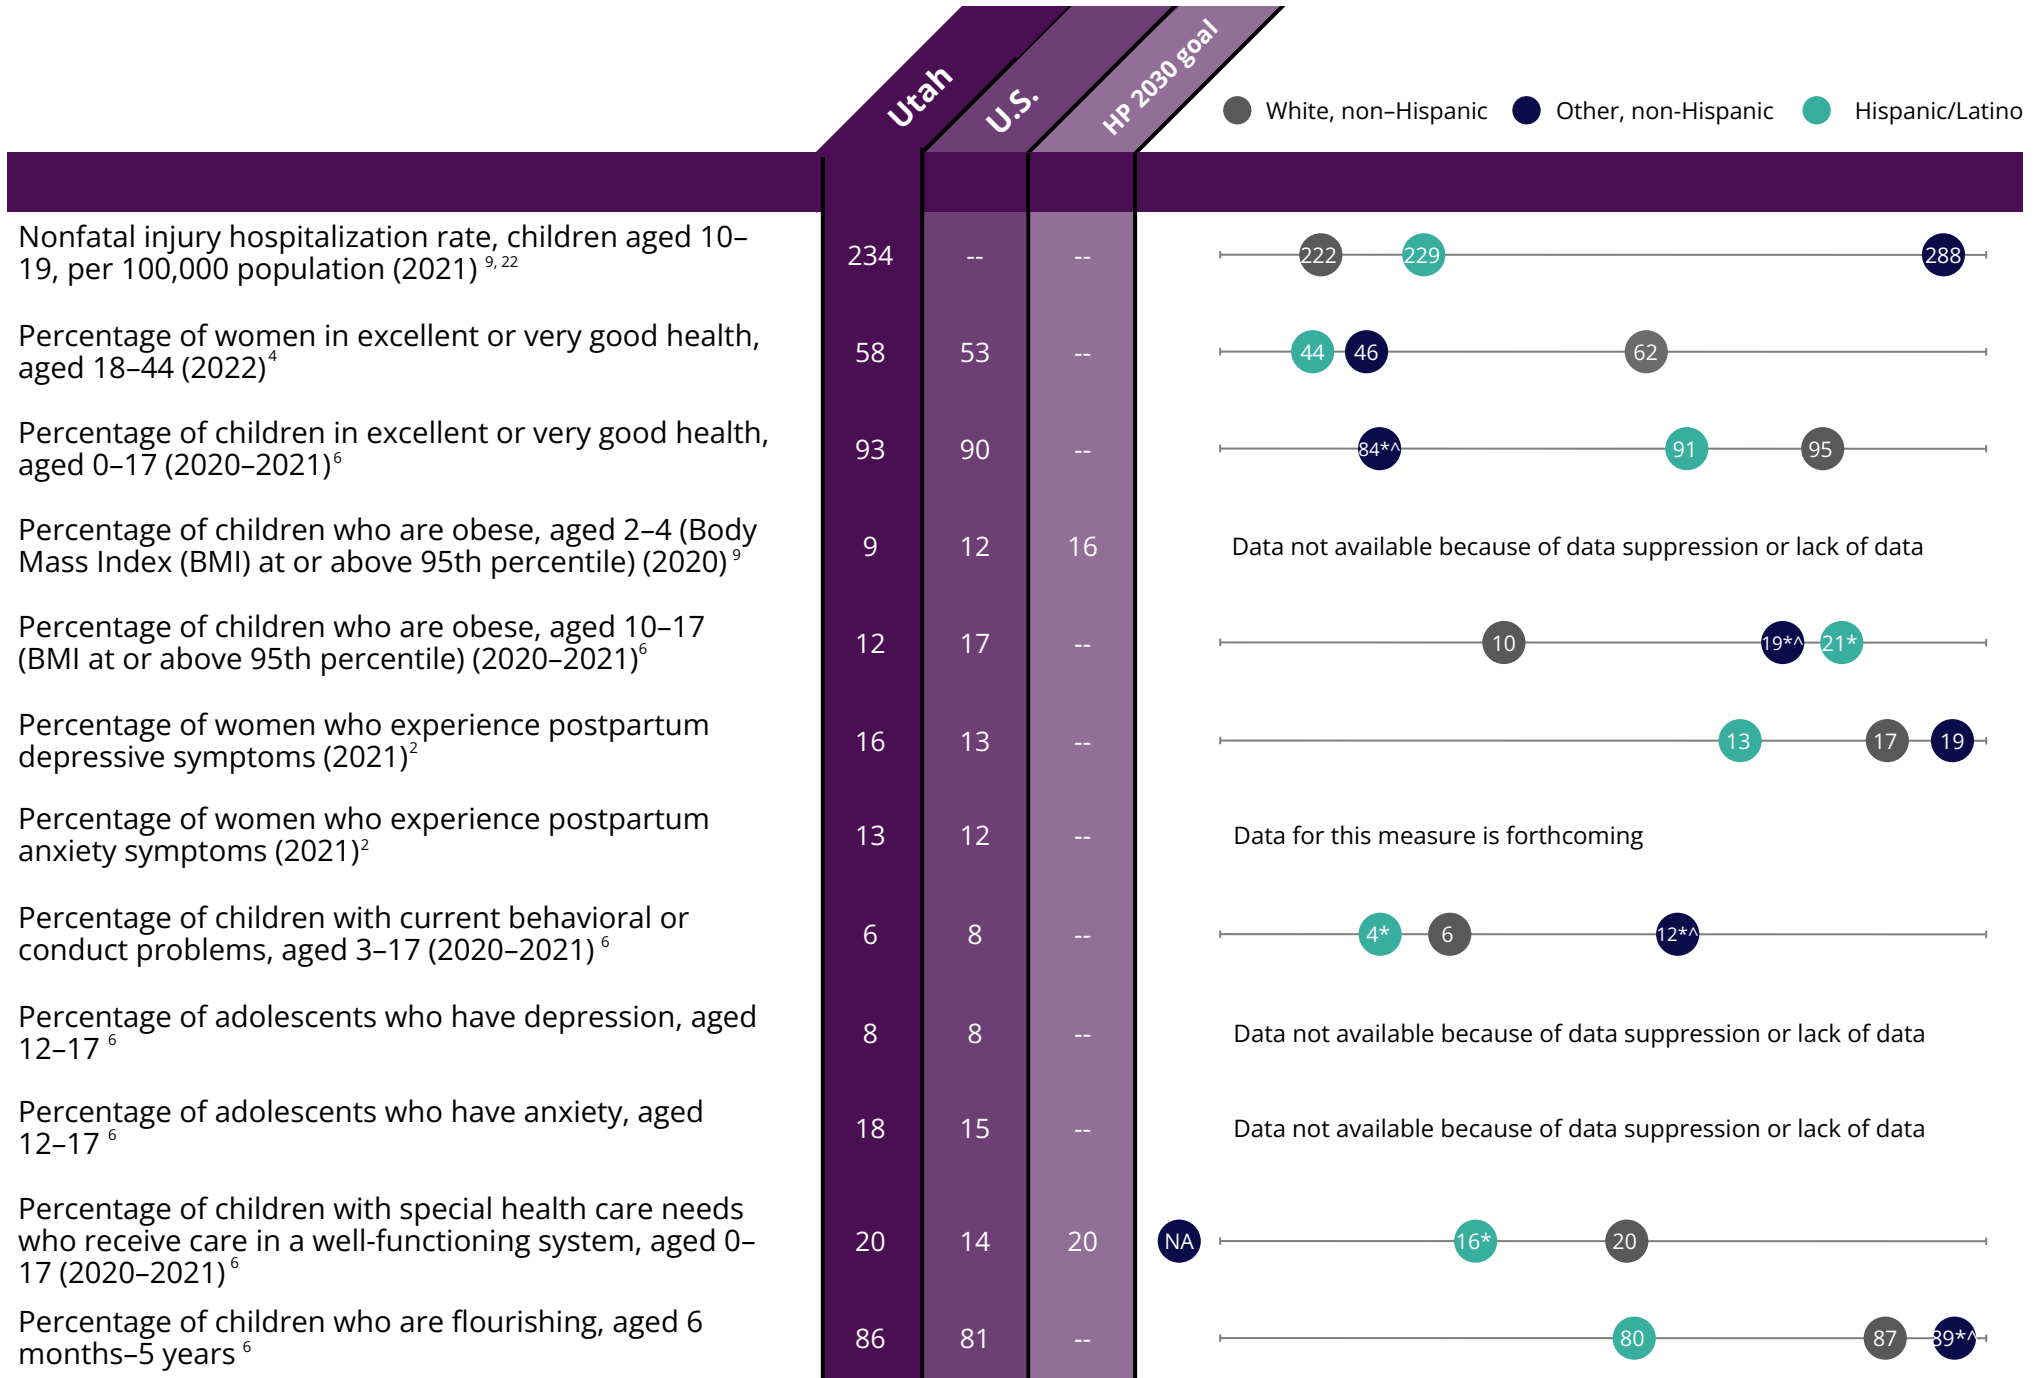

A state tracks **National Outcome Measures (NOMs)** to monitor the impact of NPMs, which are intended to drive improved outcomes relative to one or more long-term indicators of health status, quality of life, preventable morbidity, and mortality.

Title V National Outcome Measures

Title V National Outcome Measures

Healthy People (HP) 2030: <https://health.gov/healthypeople>

*Estimate should be interpreted with caution; ^Non-Hispanic Other Race does not include non-Hispanic Black in this case, and the non-Hispanic Other estimate should be interpreted with caution.

Title V National Outcome Measures

Standardized Measures (SM)

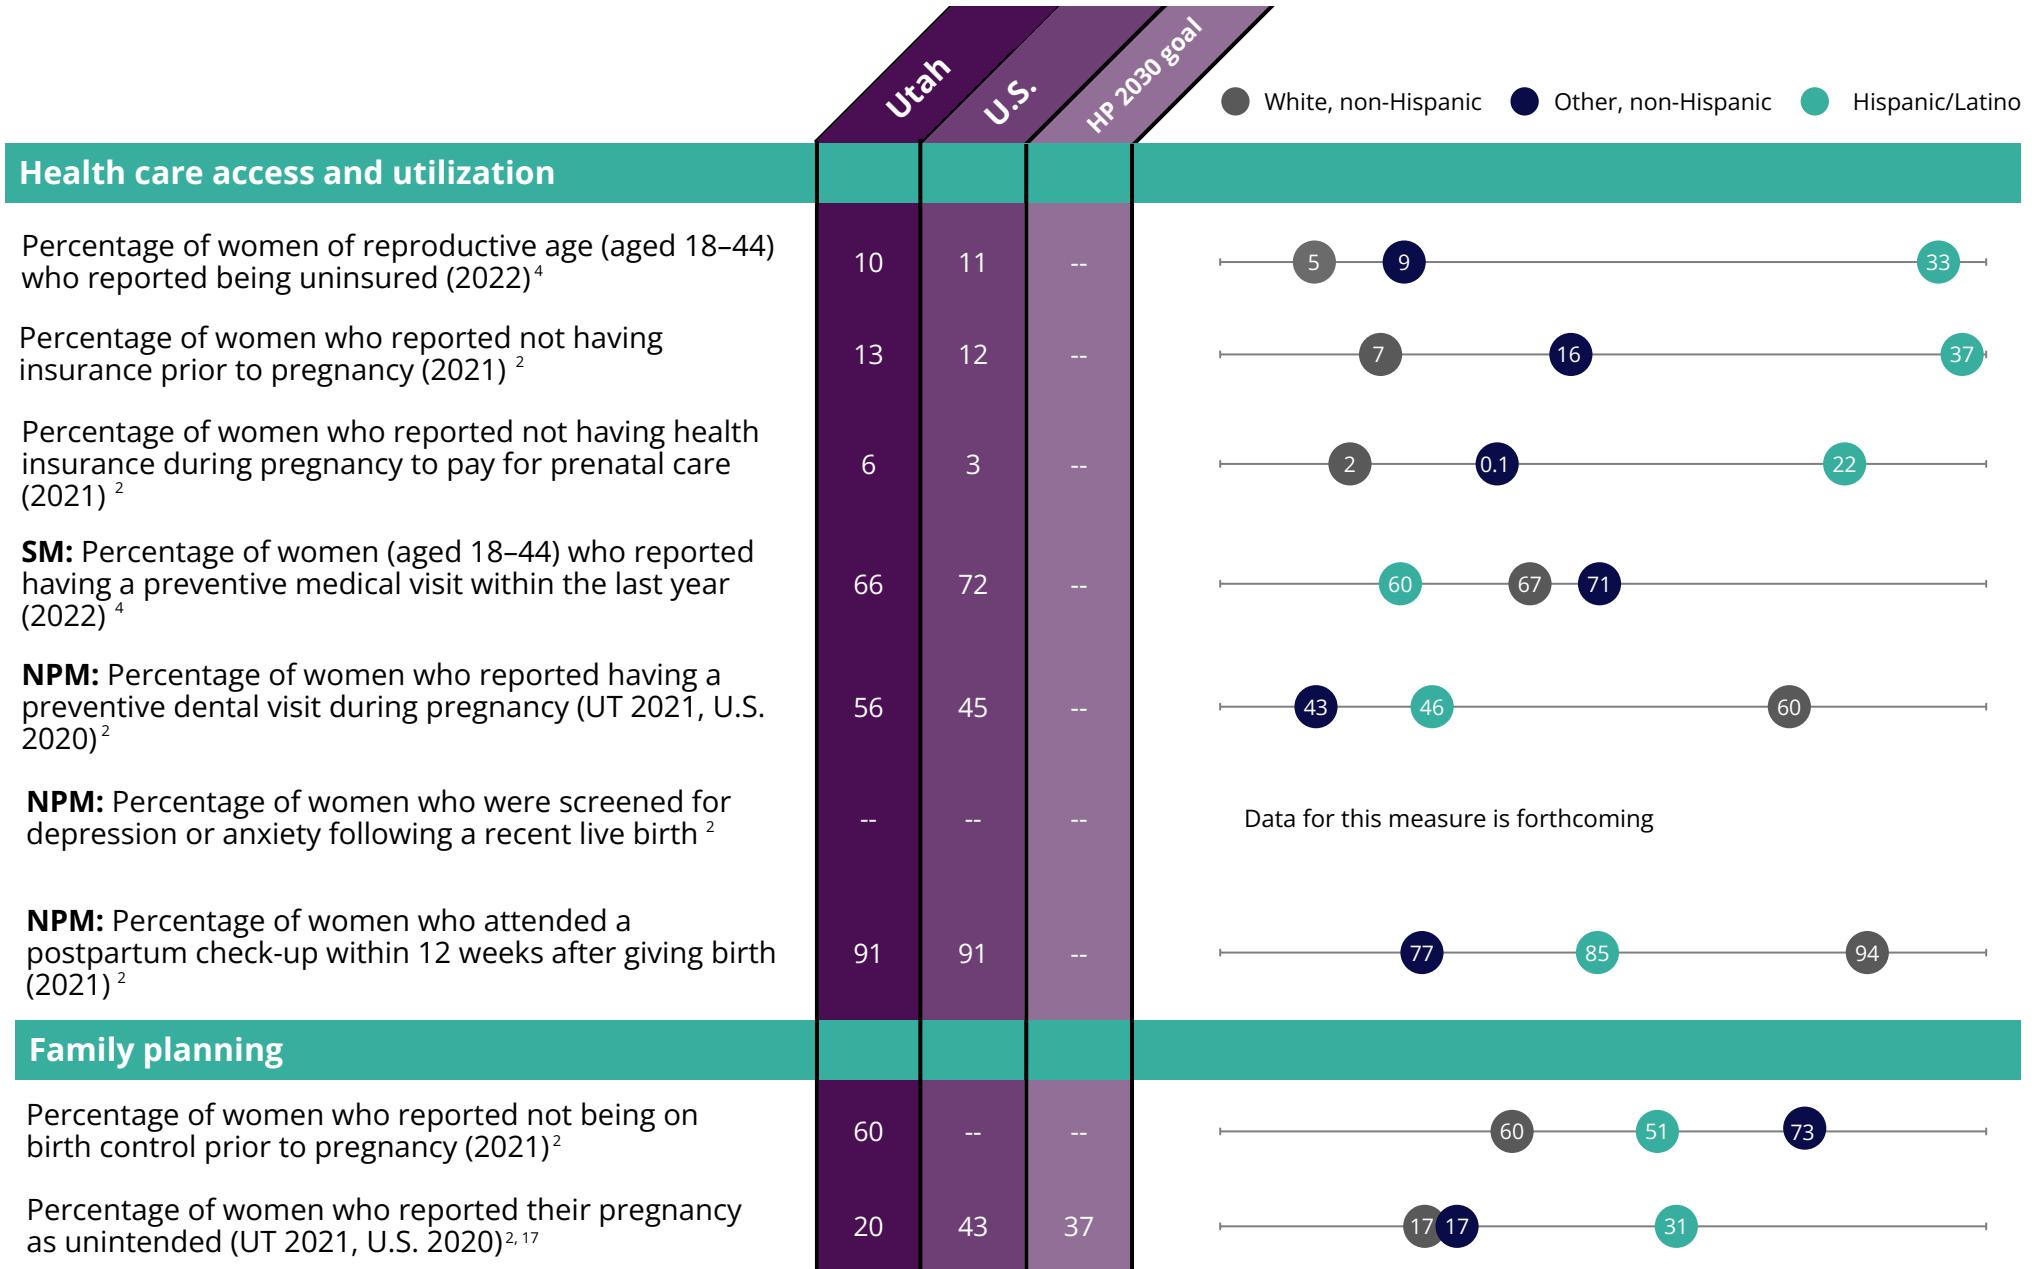

A set of **Standardized Measures** (SMs) are available through HRSA to support states in developing State Performance Measures (SPMs). SPMs can be used to address priority needs that have not been fully addressed by NPMs or ESMs.

Children and adolescent health

Social determinants

NPM: Percentage of children whose households were food sufficient in the past year, aged 0–17 (2020–2021)^{6b}

Percentage of parent who reported their child lives in a 'working poor' household, aged 0–17 (2020–2021)^{6e}

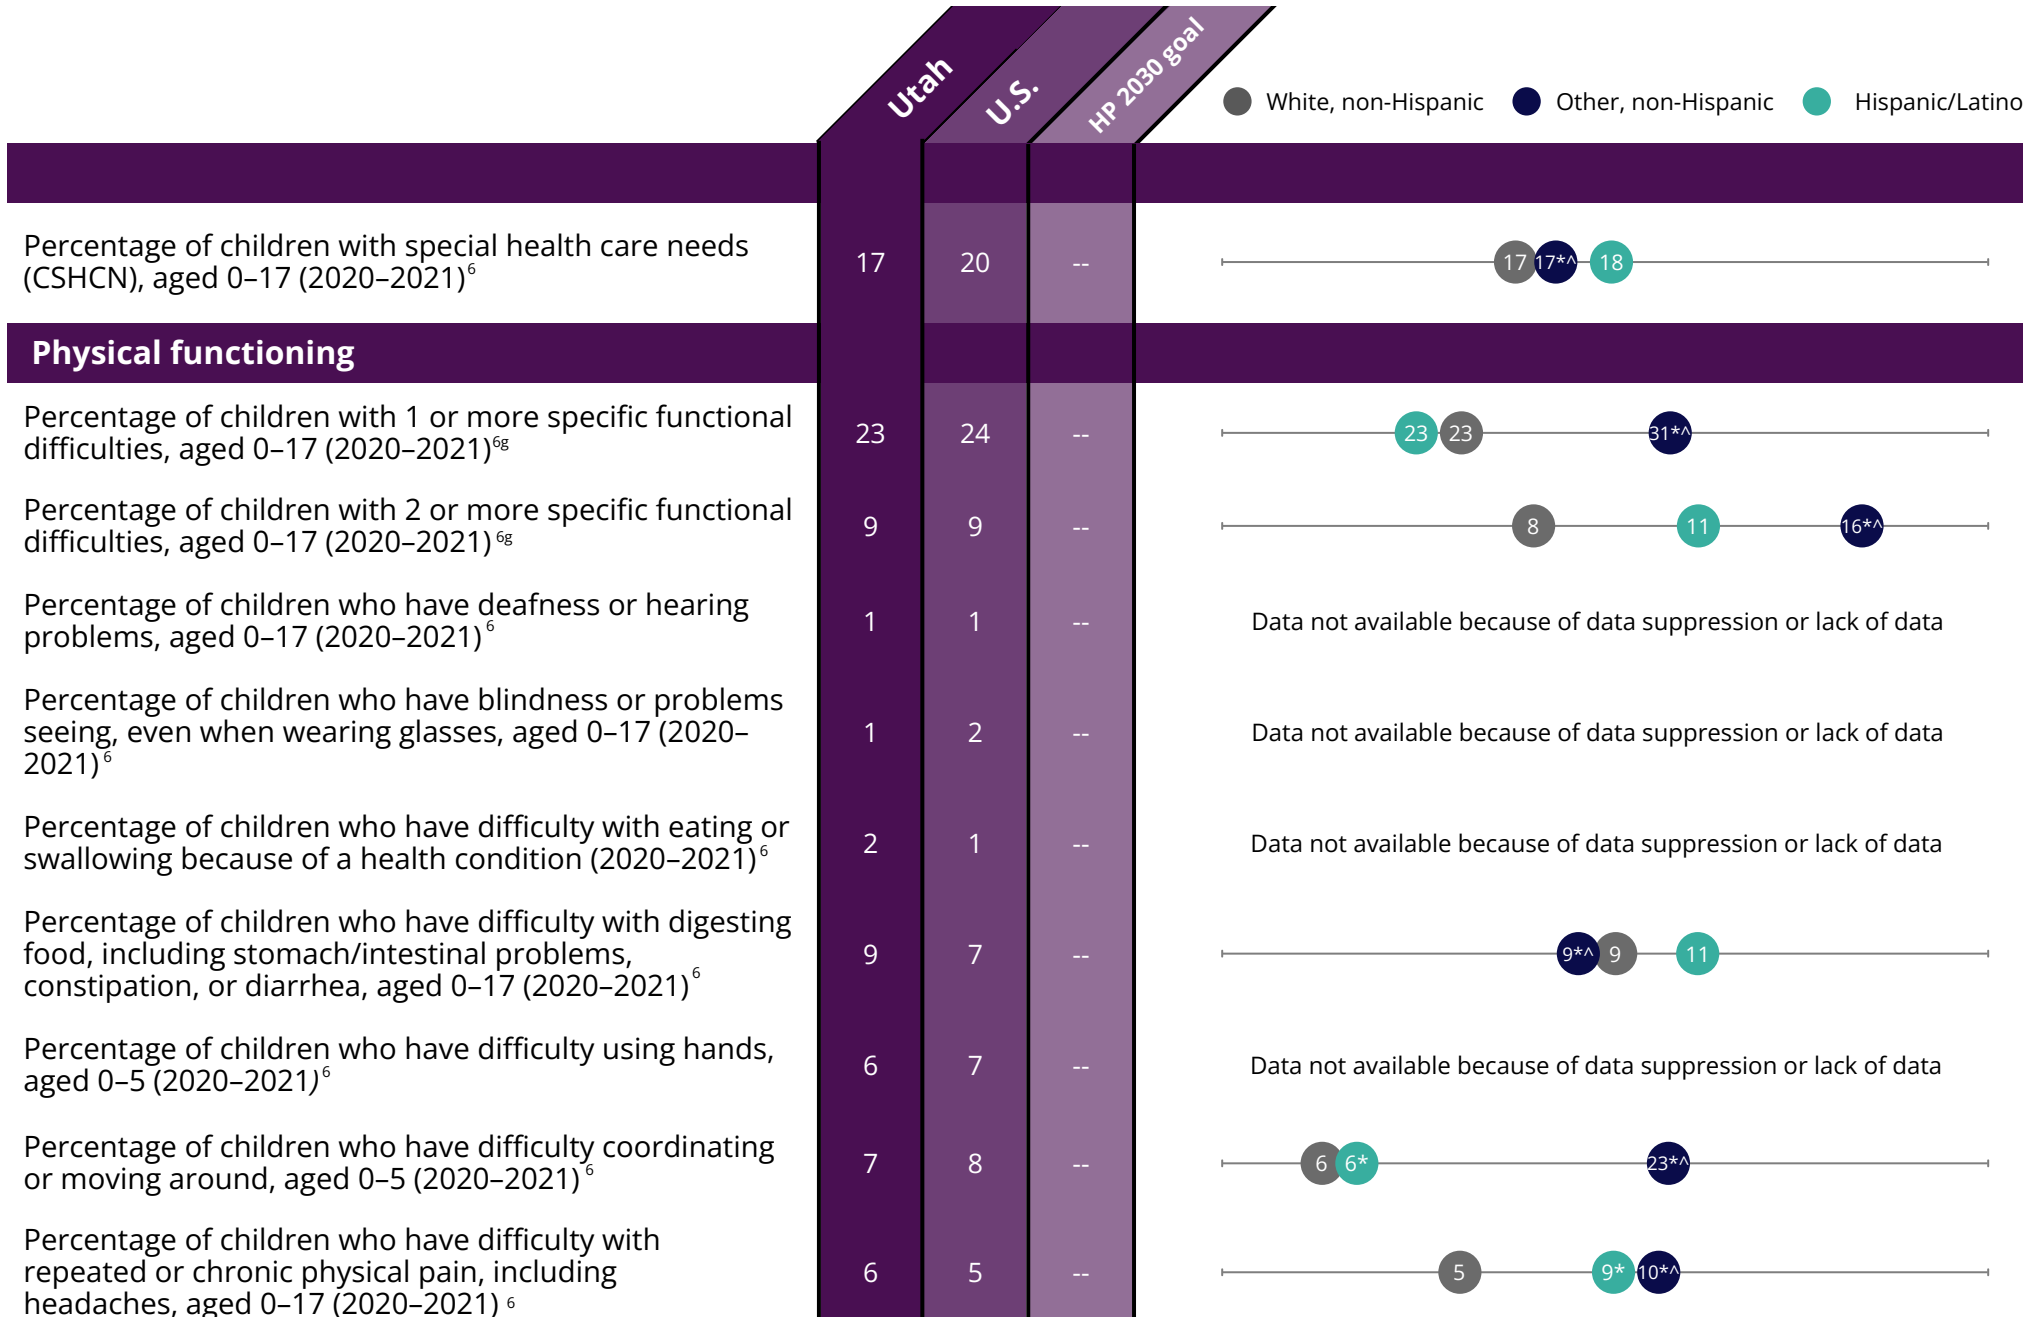

Percentage of children living in neighborhoods with a park or playground, aged 0–17 (2020–2021)⁶

Percentage of parents who reported they definitely or somewhat agree their child lives in a safe neighborhood, aged 0–17 (2020–2021)⁶

Percentage of parents who reported their neighborhood has at least 1 detracting element, aged 0–17 (2020–2021)^{6f}

CSHCN health

CSHCN health

Mental health and cognitive functioning

Percentage of children with one or more current mental, emotional, developmental, or behavioral problem, aged 3–17 (2020–2021)⁶

Percentage of children with current anxiety problems, aged 3–17 (2020–2021)⁶

Percentage of children whose parent rated the severity of their child’s current anxiety problems as moderate or severe, aged 3–17 (2020–2021)⁶

Percentage of children with current depression, aged 3–17 (2020–2021)⁶

Percentage of children whose parent rated the severity of their child’s current depression as moderate or severe, aged 3–17 (2020–2021)⁶

Percentage of children with serious difficulty concentrating, remembering, or making decisions, aged 6–17 (2020–2021)⁶

Percentage of children with current Attention Deficit Disorder (ADD) or Attention Deficit Hyperactivity Disorder (ADHD), aged 3–17 (2020–2021)⁶

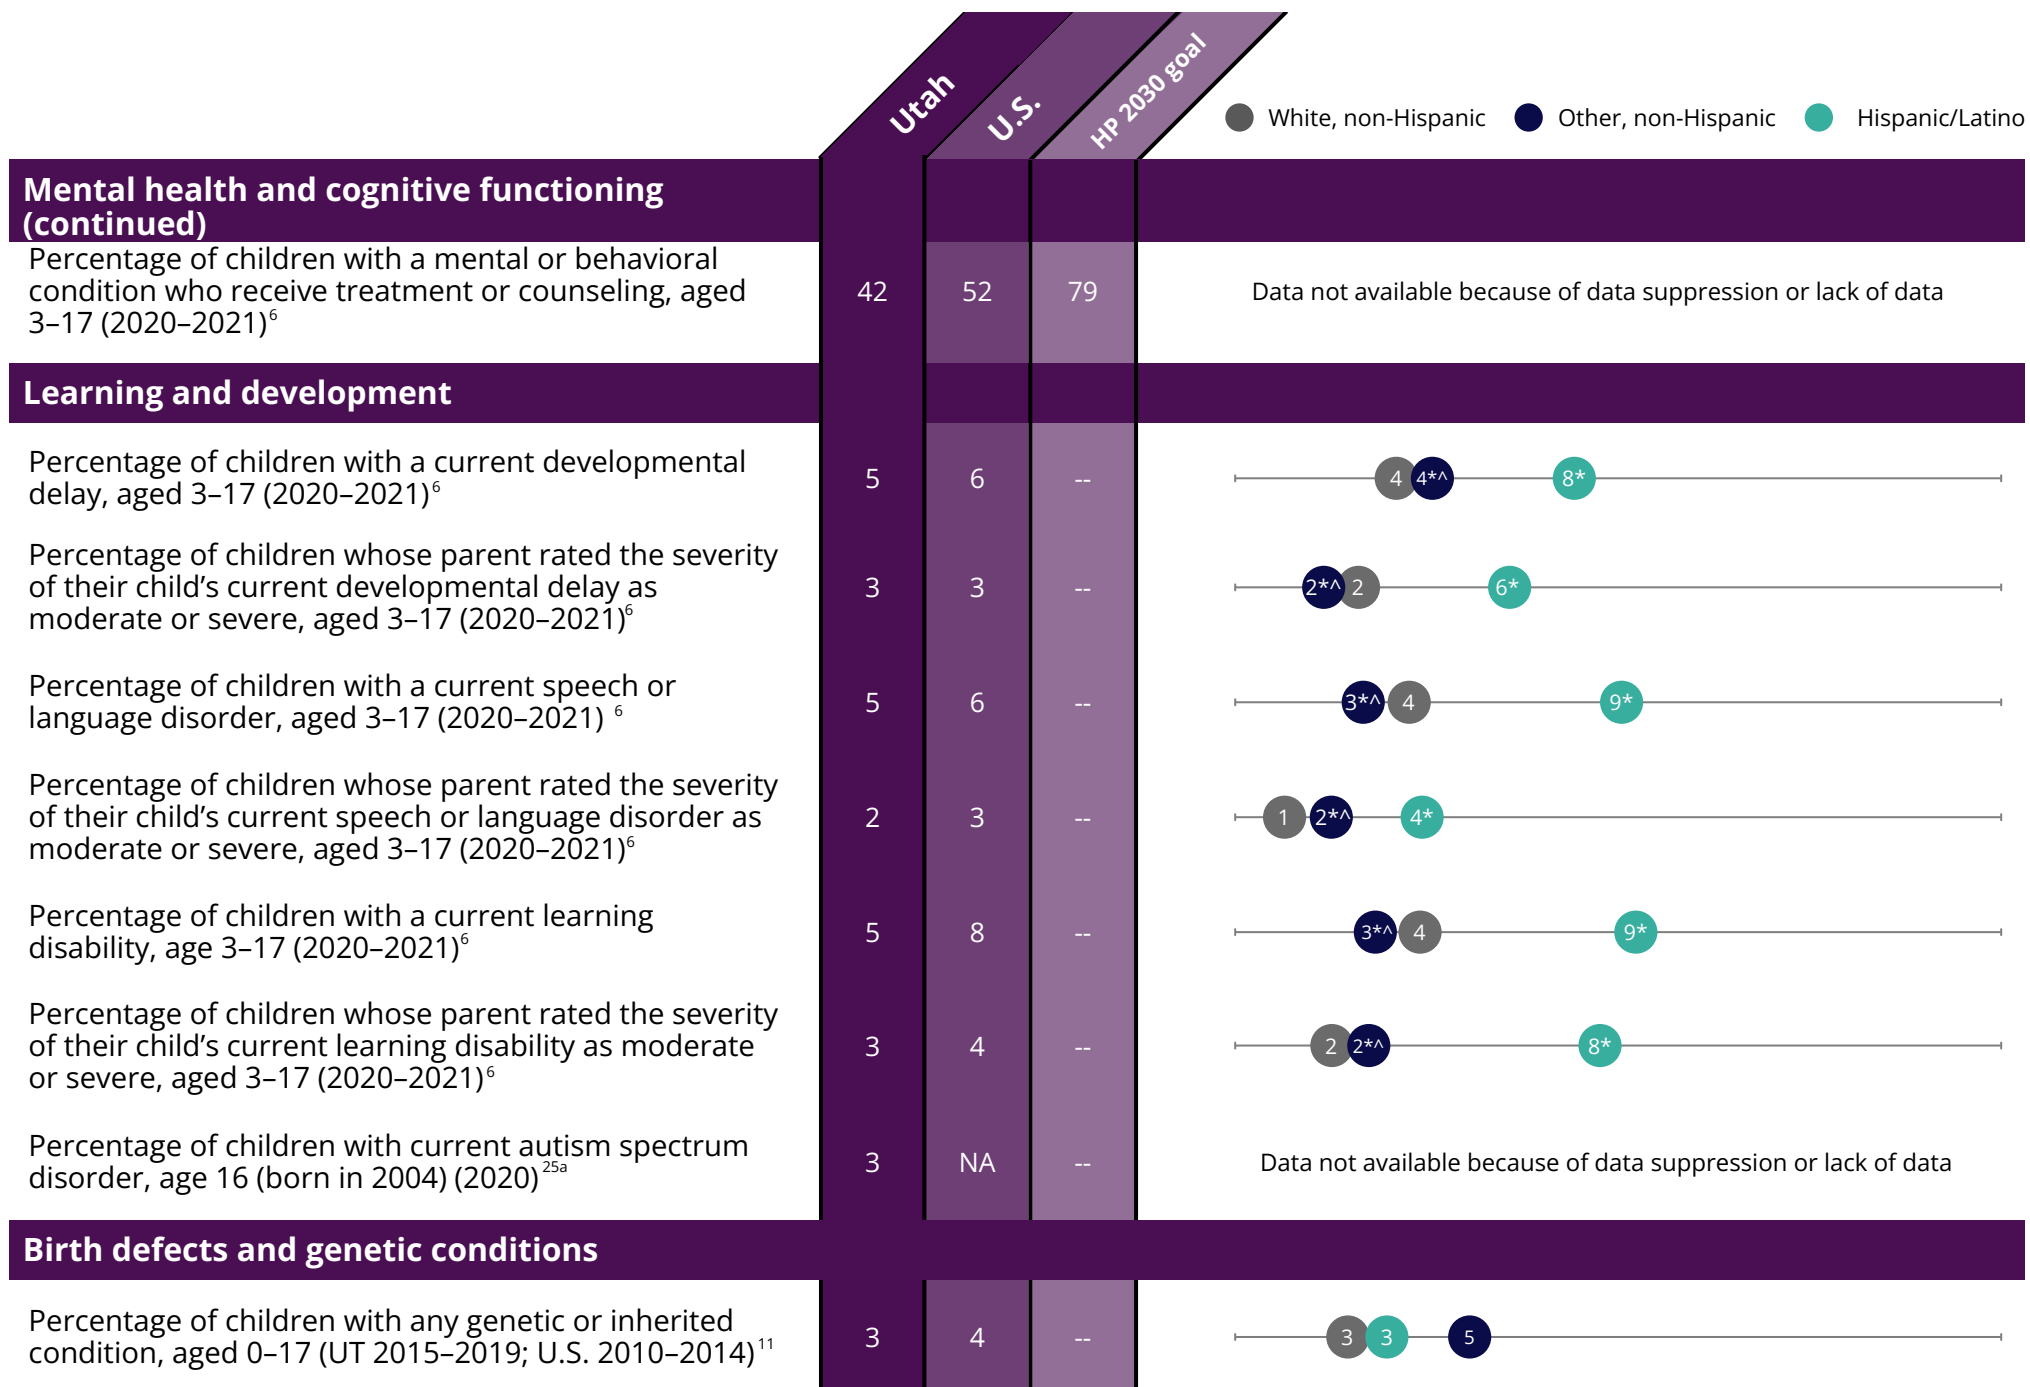

Percentage of children whose parent rated the severity of their child’s current ADD or ADHD as moderate or severe, aged 3–17 (2020–2021)⁶

NOM: Percentage of children with current behavioral or conduct problems, aged 3–17 (2020–2021)⁶

Percentage of children whose parent rated the severity of their child’s current behavioral or conduct problem as moderate or severe, aged 3–17 (2020–2021)⁶

CSHCN health

● White, non-Hispanic ● Other, non-Hispanic ● Hispanic/Latino

CSHCN health

Birth defects and genetic conditions (continued)

Percentage of children whose parent rated the severity of their child's current genetic or inherited condition as moderate or severe, aged 0-17 (UT 2015-2019; U.S. 2010-2014)¹¹

Children born with anencephaly, per 10,000 live births (UT 2015-2019; U.S. 2010-2014)¹¹

Children born with spina bifida (without anencephaly), per 10,000 live births (UT 2015-2019; U.S. 2010-2014)¹¹

Children born with hypoplastic left heart syndrome, per 10,000 live births (UT 2015-2019; U.S. 2010-2014)¹¹

Children born with tetralogy of fallot, per 10,000 live births (UT 2015-2019; U.S. 2010-2014)¹¹

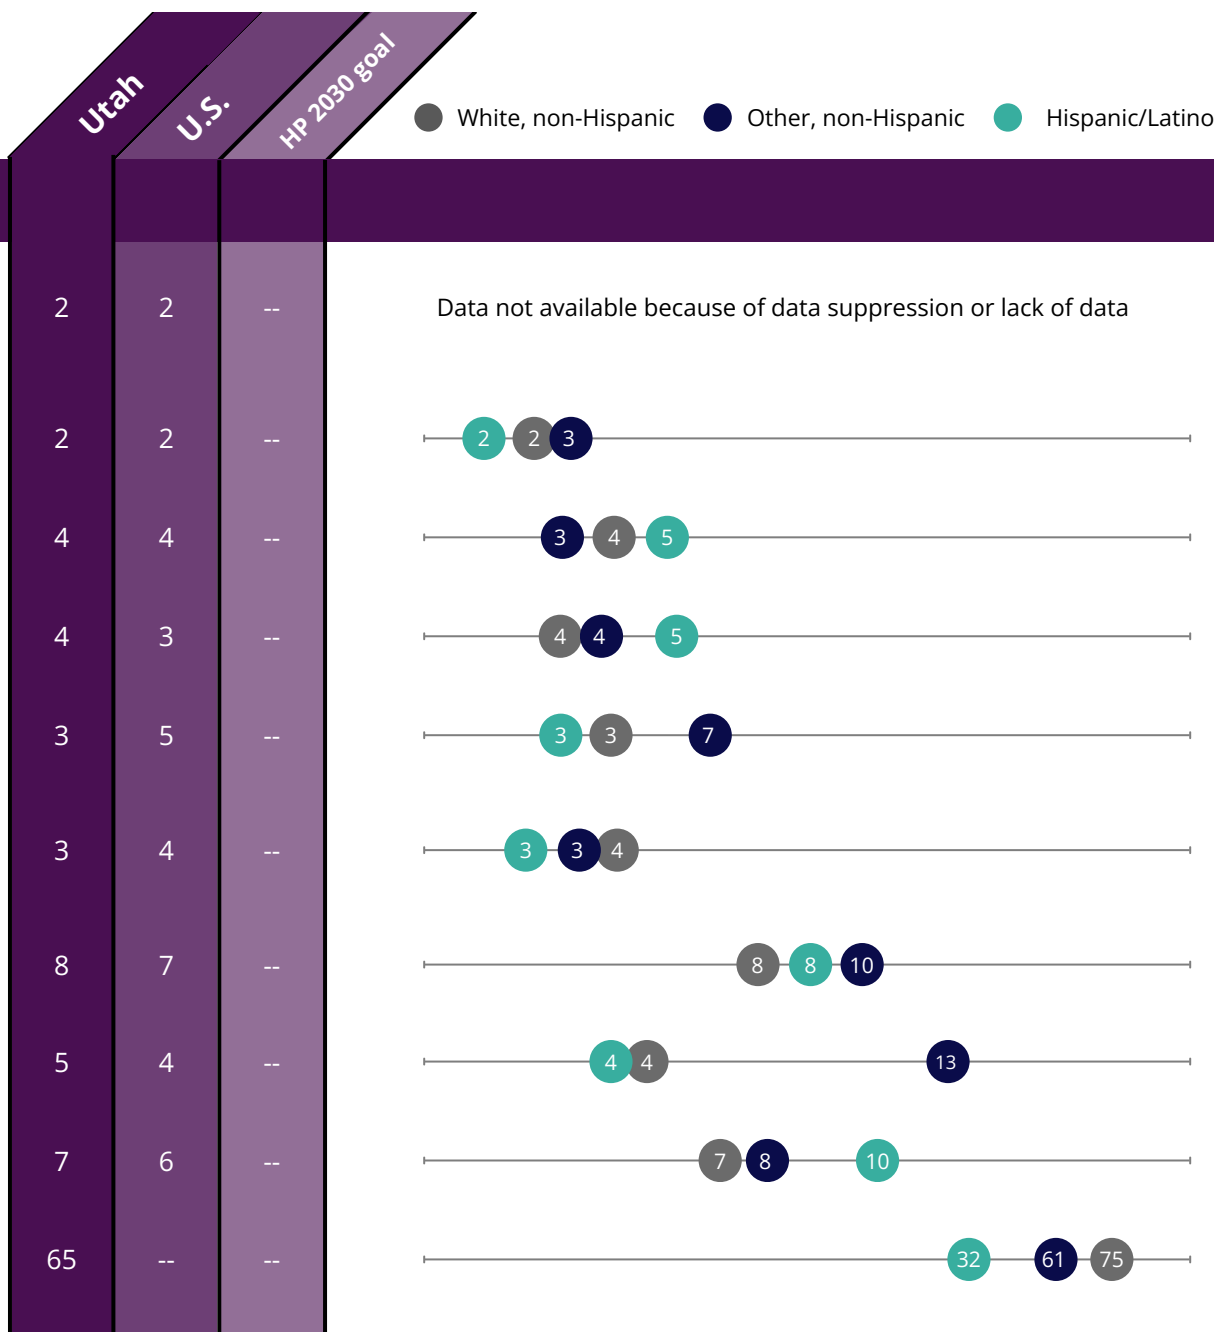

Children born with transposition of great arteries (vessels), per 10,000 live births (UT 2015-2019; U.S. 2010-2014)¹¹

Children born with cleft lip with cleft palate, per 10,000 live births (UT 2015-2019; U.S. 2010-2014)¹¹

Children born with cleft lip without cleft palate, per 10,000 live births (UT 2015-2019; U.S. 2010-2014)¹¹

Children born with cleft palate without cleft lip, per 10,000 live births (UT 2015-2019; U.S. 2010-2014)¹¹

Children born with hypospadias, per 10,000 live births (UT 2015-2019; U.S. 2010-2014)¹¹

CSHCN health

Birth defects and genetic conditions (continued)

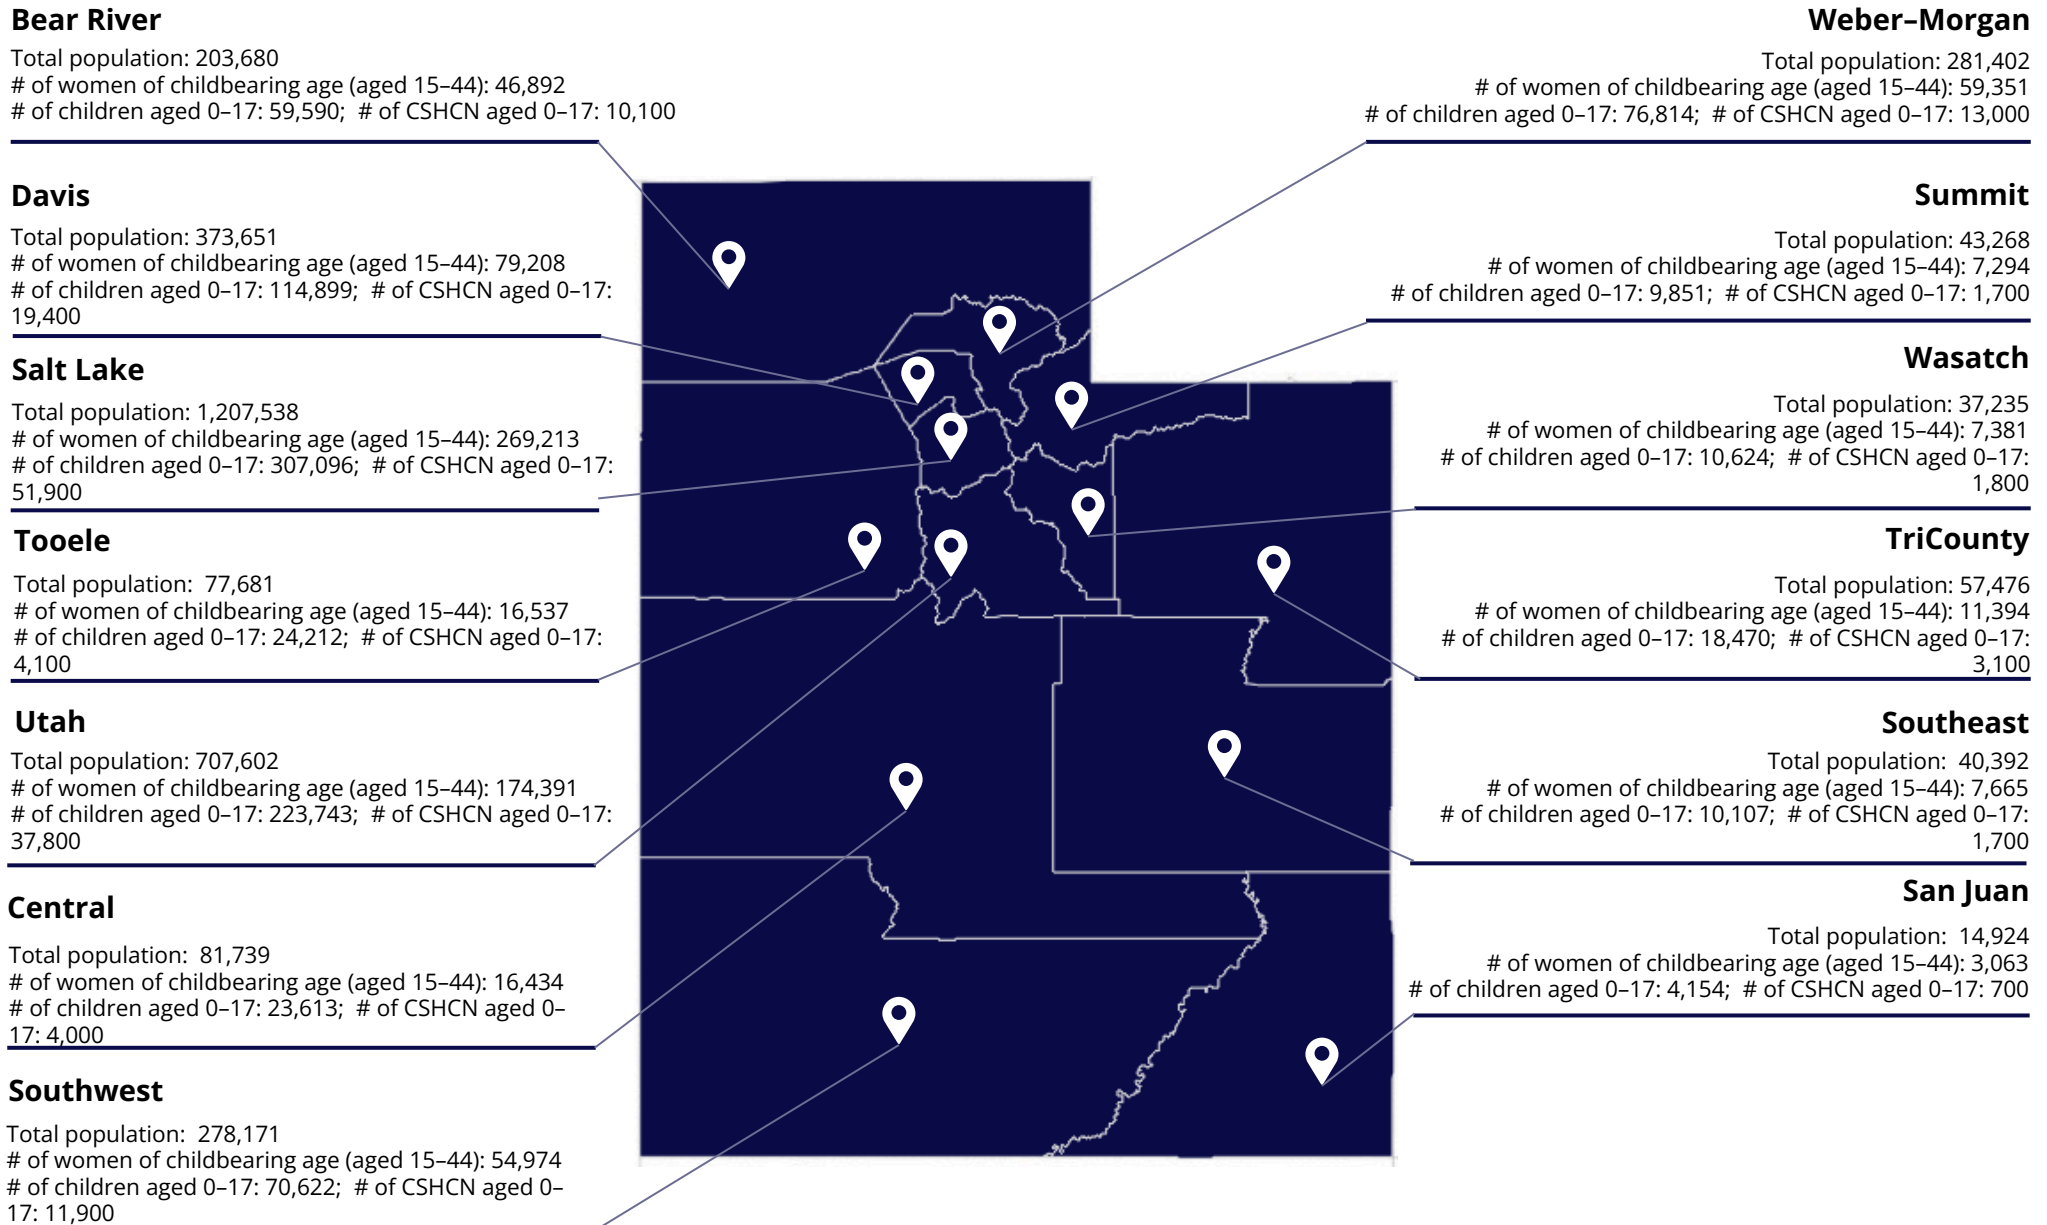

Children born with gastroschisis, per 10,000 live births (UT 2015–2019; U.S. 2010–2014)¹¹

Children born with limb deficiencies combined, per 10,000 live births (UT 2015–2019; U.S. 2010–2014)¹¹

Children born with Trisomy 21 (Down syndrome), per 10,000 live births (UT 2015–2019; U.S. 2010–2014)¹¹

Utah local health departments

Sources: total population (2022), number of women of childbearing age (most recent 3-year average 2020-2022), and number of children aged 0-17 (2021) - Kem C. Gardner Policy Institute; number of CSHCN - National Survey of Children's Health (NSCH) (2020-2021) and Kem C. Gardner Policy Institute. Estimates of CSHCN were calculated based on the assumption that the distribution of CSHCN is the same as the distribution of all children for each local health department.

- ▲ The rate in this community is better than the state, difference is statistically significant.
- ▼ The rate in this community is worse than the state, difference is statistically significant.

The community value is considered statistically significantly different from the state value if the state value is outside the range of the community's 95% confidence interval.

*Estimate should be interpreted with caution; **Estimate is suppressed due to small sample size.

References

1 American Community Survey (ACS)

a. A family is defined for statistical purposes as “a group of two people or more (one or whom is the householder) related by birth, marriage, or adoption and residing together; all such people (including related subfamily members) are considered members of one family.”

2 Pregnancy Risk Assessment Monitoring System (PRAMS)

a. Postpartum depression symptoms: Defined as responding yes to either of the following, “Since your new baby was born, how often have you felt down, depressed, or hopeless?” or “Since your new baby was born, how often have you had little interest or little pleasure in doing things you usually enjoyed?”

b. Abuse prior to pregnancy: Defined as responding yes to following, “In the 12 months before you got pregnant with your new baby, did your husband, partner, ex-husband, ex-partner, or someone else push, hit, slap, kick, choke, or physically hurt you in any other way?”

c. Abuse during pregnancy: Defined as responding yes to following, “During your pregnancy with your new baby, did your husband or partner push, hit, slap, kick, choke, or physically hurt you in anyway?”

d. Partner-associated stress during pregnancy: Defined as responding yes to any of the following, “I got separated or divorced from my husband or partner,” or “I argued with my husband or partner more than usual,” or “My husband or partner said they didn’t want me to be pregnant.”

e. Trauma related stress during pregnancy: Defined as responding yes to any of the following, “My husband, partner, or I went to jail,” or “I was homeless or had to sleep outside, in a car, or in a shelter,” or “Someone very close to me had a problem with drinking or drugs.”

f. Emotional stress during pregnancy: Defined as responding yes to either of the following, “A close family member was very sick and had to go to the hospital” or “Someone very close to me died.”

g. Financial stress during pregnancy: Defined as responding yes to any of the following, “My husband or partner lost their job,” or “I lost my job even though I wanted to go on working,” or “I had problems paying the rent, mortgage, or other bills,” or “I moved to a new address.”

h. Moderately or highly effective contraceptives include male or female sterilization or long-acting reversible contraception methods include intrauterine device (IUD) or contraceptive implant. Moderately effective methods include birth control pills, shots or injections (Depo-Provera), contraceptive patch, and vaginal ring. Least effective methods include condom, rhythm method or natural family planning, and withdrawal. Women who selected the “other” write-in option were excluded from the analysis.

3 Utah Department of Health and Human Services Utah Office of Vital Records and Statistics (OVR)

a. Adequate weight gain during pregnancy: Defined as gaining the recommended amount of weight during pregnancy, based upon the mother’s pre-pregnancy BMI and whether the pregnancy is a single or multiple gestation.

4 Behavioral Risk Factor Surveillance System (BRFSS)

5 Healthcare Cost and Utilization Project (HCUP)

a. Severe maternal morbidity (SMM) includes unexpected outcomes of labor and delivery that result in significant short-or-long-term consequences to a woman's health. Does not include blood transfusions.

6 National Survey of Children Health, Data Resource Center for Child and Adolescent Health Website (NSCH)

a. Medical home: Defined as having a personal doctor or nurse, usual source for care, and family-centered care; referrals or care coordination if needed.

b. Food sufficient: Defined as always being able to afford to eat good nutritious meals during the past 12 months.

c. A child's current insurance was considered adequate when the following criteria were met: 1) the child currently has health insurance, and 2) benefits usually or always meet child's needs, and 3) the insurance usually or always allows the child to see needed providers, and 4) the insurance either has no out-of-pocket expenses or out-of-pocket expenses are usually or always reasonable.

d. This is a composite measure of all 10 adverse childhood experiences (ACEs) items on the NSCH: hard to cover basics on family's income; parent or guardian divorced or separated; parent or guardian died; parent or guardian served time in jail; saw or heard parents or adults slap, hit, kick, or punch one another in the home; was a victim of violence or witnessed violence in their neighborhood; lived with anyone who was mentally ill, suicidal, or severely depressed; lived with anyone who had a problem with alcohol or drugs; treated or judged unfairly due to race/ethnicity; treated or judged unfairly due to sexual orientation or gender identity.

e. Working poor household: Defined as a household with income less than 100% of the federal poverty level with at least 1 caregiver employed full- or part-time.

f. Detracting element: Defined as litter or garbage on the street or sidewalk, poorly kept or rundown housing, or vandalism such as broken windows and graffiti.

g. Functional difficulties: Defined as having any of 12 specific difficulties asked about through two questions: 1) During the past 12 months, whether the child had frequent or chronic difficulty with breathing or other respiratory problems; eating or swallowing; digesting food, including stomach/intestinal problems, constipation, or diarrhea; repeated or chronic physical pain, including headaches or other back or body pain; using his or her hands; coordination and moving around or 2) Whether the child has serious difficulty concentrating, remembering, or making decisions; serious difficulty walking or climbing stairs; difficulty dressing or bathing; difficulty doing errands alone, such as visiting a doctor’s office or shopping; deafness or problems with hearing; and blindness or problems with seeing, even when wearing glasses.

7 Utah Department of Health and Human Services Early Hearing Detection and Intervention (EHDI)

8 National Immunization Survey (NIS)

a. The combined 7-vaccine series (4:3:1:3*:3:1:4) includes > 4 doses DTaP, > 3 doses poliovirus vaccine, > 1 dose measles-containing vaccine, the full series of Hib (> 3 or > 4 doses, depending on product type), > 3 doses HepB, > 1 dose VAR, and > 4 doses of PCV.

 - a. Total Cesarean section rate: Calculated as the number of births delivered by Cesarean section divided by the total number of live births less the not-stated values for delivery method, multiplied by 100.
 - b. Primary Cesarean section rate: Calculated as the number of women having a first Cesarean delivery divided by the number of live births to women who have never had a Cesarean delivery, multiplied by 100. The denominator for this rate excludes those with method of delivery classified as repeat Cesarean, vaginal birth after previous Cesarean, or method not stated.
 - c. Primary Cesarean section rate among low risk females: Calculated as the number of live births to low risk females (full-term, singleton, vertex presentation) having a first Cesarean delivery divided by the number of live births to low risk females.
 - d. Repeat Cesarean section rate: Calculated as the number of repeat Cesarean deliveries resulting in a live birth divided by the sum of vaginal births after Cesarean section (VBAC) and repeat Cesarean deliveries, multiplied by 100.
 - e. Repeat Cesarean section rate among low risk females: Calculated as the number of live births to low risk females (full-term, singleton, vertex presentation) with a previous Cesarean delivery divided by the number of live births to low risk females with a previous Cesarean delivery.
 - f. Vaginal births after Cesarean section (VBAC) rate: Calculated as the number of VBAC deliveries resulting in a live birth divided by the sum of VBAC and repeat Cesarean deliveries, multiplied by 100.
